

# CENG328 Operating Systems

## Spring 2010

### Laboratory Quiz II

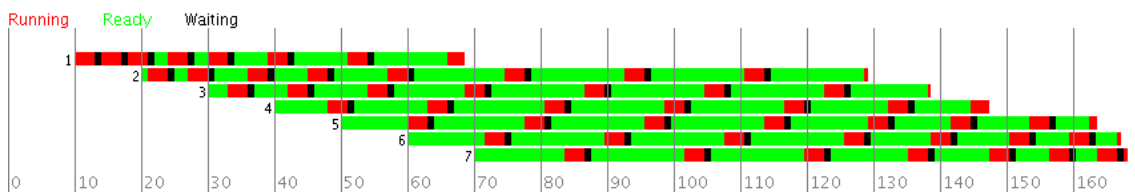

April 10, 2010

**(Section 1)**

- The graph above shows a gannt chart of a process scheduling.
- Considering IO burst time is 1 second, answer the following questions:
  1. Which algorithm is used?
  2. How many processes are used?
  3. How long is CPU burst time?
  4. What is process interarrival period?
  5. What is running duration for each process?

**(Section 2)**

- The graph above shows a gannt chart of a process scheduling.
- Considering IO burst time is 1 second, answer the following questions:
  1. Which algorithm is used?
  2. How many processes are used?
  3. How long is CPU burst time?
  4. What is process interarrival period?
  5. What is running duration for each process?
